ELECTION OFFICIALS

WHEREAS, the Town Board of Dale, Outagamie County, Wisconsin. In order to better facilitate the management of elections, does hereby make the following findings and ordinance.

SECTION 1 FINDINGS

The presumptive number of inspectors for all elections, pursuant to statute, is seven (7).

The nature of the elections, including but not limited to the issues and candidates, varies between elections and results in significantly different turnouts.

Further, it is inadvisable that polling inspectors be required to be present the entire period of time which a poll is open and ballots are counted.

The Town Clerk is charged with supervision of elections, and the Town Board may also appoint a chief inspector to act in the clerk's behalf.

The Town Board may also reduce the number of election officials to no less than three (3) and may provide for selection of alternates and officials, and provide for the selection of two (2) sets of officials to work at different times on Election Day.

It is in the best interest to the town to grant the Town Clerk the discretion and authority to divide the election officials into two (2) sets with alternates, and to determine the number of election officials necessary for each election, subject to the minimum required elsewhere by law, and to appoint a chief inspector of elections.

Therefore, the Town Board of the Town of Dale does ordain as follows:

The Town Clerk shall have the authority and discretion to determine the number of election officials necessary for each election, but not less than three (3) per polling place.

The Town Clerk shall have the authority and discretion to divide the election workers appointed by the town board into not more than two (2) sets, with an equal number of alternates per set. Such sets of election officials to work at different times on Election Day as necessary.

The Town Clerk shall have the authority and discretion to appoint a chief inspector from the election officials appointed by the Town Board.

M. Severability – Should any word, phrase, clause, sentence, paragraph or portion of this ordinance and franchise be declared to be invalid by a Court of competent jurisdiction, such adjudication shall not affect the validity of this ordinance and franchise as a whole, but shall only affect the portion thereof declared to be invalid; and the Town hereby expressly states and declares that it would nonetheless have passed this ordinance and granted this franchise had it known that any such word, phrase, clause, sentence, paragraph, or portion of said franchise were invalid.

N. Compliance to Laws, Rules, and Regulations – In the event any valid law, rule, or regulation of any governing authority or agency having jurisdiction, including, but not limited to, the Federal Communications Commission, contravenes the provision of this ordinance subsequent to its adoption, then the provisions hereof shall be superseded to the extent that the provisions hereof are in conflict with any such law, rule, or regulation.

O. Protection of Non-subscribers – Grantee shall at all times keep its cables and other appurtenances used for transmitting signals protected in such a manner that there will be no interference with communications signals received by persons not subscribing to grantee's service.

Additional Finding: Further, at various times and places individuals have attempted to service more than one premise or residence by means of easements or like devices. The town has a legitimate interest in assuring access to such premises or residences for services it provides and for the health and well being of its residences. The town, therefore, finds that it is contrary to the health and safety of its residences to allow the construction of any premise of any sort or dwelling for human occupancy unless all such premises or dwelling are located on individual parcels which include adequate frontage on a town road.

SECTION III. Frontage and Access Requirements: No building permit shall be issued for the construction of a new dwelling or premise for human occupancy unless such construction shall be located on an individual parcel meeting the minimum county or town ordinance requirements and unless the parcel has the following minimum frontage on an approved and accepted town road:

If located on a cul-de-sac: 60 feet of frontage

If not located on a cul-de-sac: 100 feet of frontage.

This ordinance does not preclude the use of shared or easement driveways provided the above requirements are satisfied. All private driveway agreements for private roads longer than 200' must reserve for public use 66 ft. of right of way that is recorded with the Register of Deeds reflecting such reservations.

The attached specifications for roads and subsequent amendments thereof to be built in the Town of Dale are fair and reasonable and are hereby made the minimum road specifications for the Town of Dale. All construction after July 14, 1998, the date of adoption of the Road Specifications Ordinance 7:00, shall comply with such specifications. All subsequent modification to the Road Specification, adopted by the Town Board shall continue at the time of commencement of construction and the most strict interpretation or version shall control at the time of commencement of construction.

TOWN OF DALE ROAD SPECIFICATIONS

November, 1997

Revised May 2, 2003

I. INTRODUCTION

1. Purpose The purpose of these specifications is to establish minimum construction standards for public roads in the Town. These specifications shall apply to roads constructed in the Town in anticipation of acceptance by the Town as a public Town Road.

2. Other Specifications For the purposes of these "Specifications for Town Road Construction," the latest edition of the "State of Wisconsin Department of Transportation Standard Specifications for Highway and Structure Construction" shall be called the "State Specifications."

3. Plan Approval Construction Inspection, and Project Approval Plans shall be reviewed by the Town Board and the Town Engineer. The Town Engineer will be responsible for construction inspection and any necessary on-site decisions unless another agent is designated by the Town Board. On roads which are being constructed by private developers, the developer's engineer shall submit grade summary sheets to the Town Engineer, which show the comparison of actual field measurements to plan measurements for all subgrades, ditches, and base courses. Grades will be considered acceptable if they are between .15" low and .05" high for subgrade and between .05" low and .15" high for gravel grade. Roads will be accepted into the Town road system by the Town Board by formal action upon documentation by the Town Engineer that all improvements meet the town of Dale requirements.

4. Construction Dates Road construction shall take place only between May 1 and November 15 of each year or at the discretion of the Town Board.

5. Road Classifications Local roads are to be those with the lowest traffic count, with access to private property being their principal function. Collector roads are intended to be highways acting as collectors from local roads to higher priority roads or developed areas. The Town has no jurisdiction over arterial roads. Roads shall also be classified as residential, commercial, or industrial depending on the characteristics of traffic anticipated.

Town roads shall be classified as local residential roads, unless otherwise designated by the Town Board. Classification of roads shall be at the discretion of the Town Board and shall be based on anticipated traffic counts, character of anticipated traffic, and relation of the proposed road to traffic patterns and other highway systems.

II. RIGHT-OF-WAY REQUIREMENTS

1. Local Roads Local Town roads shall have a 66 foot dedicated right-of-way. The right-of-way for cul-de-sac bulbs shall have a minimum radius of 60 feet.

2. Collector Roads Town collector roads shall have a 80 foot right-of-way. Collector roads shall be designed as through roads. Any termination due to phasing shall have a temporary turnaround installed.

III. DESIGN

1. Responsibility In private developments, the developer's engineer is responsible for the design of the public roads. The design shall meet the site specific conditions, but in no case shall be less than the minimum standards. The Town may require higher construction standards if, in the opinion of the Town, such increased standards are warranted. Plans shall be submitted to the Town two weeks prior to the next Town Board meeting for review and action, prior to the commencement of construction.

2. Alignment Standards

Arterial Streets: Arterial streets shall be arranged so as to provide ready access to centers of employment, high density residential areas, centers of government activity, community shopping area, community recreation and points beyond the boundaries of the community. They shall also be properly integrated with and related to the existing and proposed system of major streets and highways and shall be, insofar as is practicable, continuous and in alignment with existing or planned streets with which they are to connect.
2. Collector Streets: Collector streets shall be arranged so as to provide collection of traffic from residential areas and conveyance of this traffic to the major street and highway system and shall be properly related to special traffic generators, such as schools, churches and shopping centers and other concentrations of population and to the major streets into which they feed.
3. Minor Streets: Minor streets shall be arranged to conform to the topography, discourage use by through traffic, permit the design of efficient storm and sanitary sewerage systems and require the minimum street area necessary to provide safe and convenient access to abutting property.
4. Proposed Streets: Proposed streets shall extend to the boundary lines of the tract being divided, unless prevented by topography or other physical conditions or unless, in the opinion of the Town Board or County Zoning Committee. Such extension is not necessary or desirable for the coordination of the layout of the land division or for the advantageous development of adjacent land tracts. Such streets shall terminate with a temporary turn-around of 60 feet right-of-way radius and a roadway of not less than 45 feet in radius.
5. Arterial Street and Highway Protection: Whenever the proposed land division contains or is adjacent to a major street or highway, adequate protection of residential properties, limitation of access and separation of through and local traffic shall be provided by reversed frontage, with screen planting contained in a nonaccess reservation along the rear property line or by the use of frontage streets.
6. Reserve Strips: Reserve strips controlling access to streets or alleys shall be prohibited, except where their control is definitely placed with the Town or County.
7. Alleys: Alleys may be required in commercial and industrial districts to provide for off-street loading and service access, but shall not be approved in residential districts unless required by unusual topography or other exceptional conditions. "No outlet" alleys shall not be approved and alleys shall not connect to a federal, state or county trunk highway.
8. Street Names: Street names shall not duplicate or be similar to existing street names within Outagamie County and existing street names shall be projected or continued wherever possible.

If street stubs create corner lots, access to said lots may be restricted to only the through street and not the street stub. Any street stub may be required to have utility stubs and be fully improved to Town road standards.

B.

C. LIMITED ACCESS HIGHWAY / RAILROAD RIGHT-OF-WAY TREATMENT

Whenever the proposed land division contains or is adjacent to a limited access highway or railroad right-of-way, the design shall provide the following treatment:

1. When residential lots within the proposed land division back upon the right-of-way of an existing or proposed limited access highway or railroad, the following restriction shall be placed on the face of the Plat: "Direct vehicular access to (name of road) from lots abutting such road is prohibited".
2. Commercial and industrial districts should provide on each side of the limited access highway or railroad a street approximately parallel to and at suitable distance from such highway or railroad for the appropriate use of the land between such streets and highway or railroad, but not less than 150 feet.
3. Streets parallel to a limited access highway or railroad right-of-way, when intersecting a major street and highway or collector street which crosses such railroad or highway, shall be located at a minimum distance of 250 feet from such highway or railroad right-of-way. Such distance, where desirable and practicable, shall be determined with due consideration of the minimum distance required for the future separation of grades by means of appropriate approach gradients

C. STREET DESIGN STANDARDS

All Streets shall be designed and constructed in accordance with the current Town of Dale Road Specifications which are available in the Town Clerk's office.

D. SECOND ACCESS POINT

In the event a proposed Plat does not include a second access point, the following shall be required:

An area mapped and dedicated to the public attaching the subject Plat to an adjoining parcel, unless the topography, including location of wetland areas or flood plain areas make such an area impracticable. Such area must be sufficient for the future construction of a road to Town standards, including applicable setbacks.
2. In any Plat in which a proposed single access road exceeds 600 feet in length, in addition to the requirement in paragraph A, of this Section immediately above, without any exception for topography, an officially mapped road by statute to an appropriate adjoining street must be recorded. The following requirements to create the necessary Official Mapped Street is as follows:
 - a) All costs associated with the mapping shall be at the cost of the developer, including engineering review, mailing, publishing and meeting fees. Prior to commencement of any action by the Town, the Town Clerk shall provide an estimate for the above and such funds must be provided prior to any action being commenced.

Pedestrian ways of not less than 10 feet in width may be required near the center and entirely across any block over 900 feet in length where deemed essential by the Town Planning Commission to provide adequate pedestrian circulation or access to schools, shopping centers, churches, or transportation facilities.
3. Width: Blocks shall have sufficient width to provide for 2 tiers of lots of appropriate depth, except where otherwise required to separate residential development from through traffic or where lots abut a lake or stream. Width of lots or parcels reserved or laid out for commercial or industrial use shall be adequate to provide for off-street service and parking required by the use contemplated and the area zoning provisions for such use.
4. Utility Easements: All utility lines for electric power and telephone service shall be placed on mid-block easements along rear lot lines except where lots abut a lake or stream or where such a location is deemed engineeringly unfeasible by the utility companies involved.

3. Access: Every lot shall front or abut a public street and have direct vehicular access to that public street for a distance of at least 33 feet. Direct access does not include the use of easements.
4. Unsewered Lot Area And Dimensions: The minimum 1.25 lot size may only be reduced upon all of the following:
 - a.) The average lot size is at least 1.25 acres within the Plat.
 - b.) At least 80% of the lots exceed 1.25 acres within the Plat.
 - c.) No lot shall be under 1 acre in unsewered areas.
 - d.) The topography of the land within the Plat is conducive to the proposed exception.

5. Width of lots in Unsewered Areas: All lots shall be a minimum of 100' through the proposed building area of the lot. Cul-de-sac lots, may have a minimum of 60' of road frontage, but follow the 100' requirement through the building area .
6. Sewered Lot Area and Dimensions: In sewered areas lots shall be a minimum of 1 acre without storm sewer, curb, and gutter. In sewered areas, lots under 1 acre the subdivider will be required to provide storm sewer, curb, and gutter. No lot shall be less than .5 acre.
7. Width of Lots in Sewered Areas: All lots shall be a minimum of 80' through the proposed building area of the lot. Cul-de-sac lots may have a minimum of 60' of road frontage, but shall follow the 80' requirement through the building area.

SECTION 7 CLUSTER SUBDIVISIONS/PLANNED UNIT DEVELOPMENTS

A. PURPOSE

Grouping of residences in clusters will permit individual minimum lot sizes to be reduced, provided overall density within the subdivision, is maintained. The remaining undeveloped area within the subdivision can be used, to provide common open space and preserve the scenic qualities of an applicable environmentally sensitive area. Grouping of residences facilitate common water and sewage disposal systems and encourages the improved use of the land in proper respect to the preservation of natural resources.
